

Single-channel Linear DC Power Supply

MPS-D+ Series

- Voltage and current presetting function makes it easier to operate;
- It adopts new single-chip technology to control, with high integration, simple circuit and low failure rate.
- Output on/off function;
- Smart fan makes your working environment more quiet;
- Using high-precision low-temperature drift manganese copper wire for current sampling to ensure high-precision low-temperature drift.
- OTP function protects the machine more comprehensively.
- MPS-6003D+/6005D+ have short-circuit protection function (output off when short-circuit, and restored after turning off for 2S).
