

RMQ Titan Description

Aesthetics and functionality

Attractive looks and practical operation – this combination is exemplified by industrial design from Moeller. The new RMQ Titan Control Circuit Devices program underscores this claim. The titanium-coloured front ring lends the program its name – and offers the devices and systems in a modern package with numerous application advantages. Naturally, RMQ Titan Control Circuit Devices are designed for worldwide application. They comply with all relevant international standards such as IEC/EN 60 947 as well as certification requirements and guidelines such as UL and CE. The high IP 66 degree of protection permits use in rugged industrial applications. The program is therefore extremely flexible.

Practical orientation that pays off

The ergonomic design of the new control circuit devices pays dividends in daily use. Button elements, for instance, are correctly shaped for the fingertips. Indicator lights are fitted with specially developed lenses which guarantee perfect illumination.

Colours speak louder than words

A clear colour signal replaces long explanations. Specified colours are assigned commands and meanings which are internationally understood. The illuminated operating elements and Indicator lights clearly display these colours even in darkness or distraction from other lights. To prevent yellow light from filament bulbs interfering with the lens colours, RMQ Titan Control Circuit Devices are provided with LEDs in red, green, white and also blue, when required.

LEDs – dependable, economical lighting elements

LEDs require less current and thus produce less heat than filament bulbs. They also have no thin little wires that often burn through after a time or break due to shock or vibration. In fact, LEDs are completely vibration-proof and they function 100,000 hours non-stop with no loss of signal data. With no chance of sudden outages, device monitoring is best ensured.

11.5 years non-stop – a far-sighted decision

100,000 operating hours corresponds to 11.5 years in constant operation. After this length of time, RMQ Titan LED elements do not simply go out – their illumination intensity has simply dropped by half. Replacing a lamp is just as superfluous as planning and wiring a new lamp circuit. Even ordering is simplified since the LED and holder are delivered as a complete unit. With two voltage ranges from 18 – 30 VAC/DC and 85 – 264 V AC, all common applications are covered. Storage requirements are thus reduced considerably as well.

LED – illuminating the future for control circuit devices

RMQ Titan Description

RMQ Titan sheds light on all processes

Whether in the control panel or, for example, in suspension panels, signals are securely transmitted with RMQ Titan. The new illuminated emergency stop button has an integrated indicator light. This safety component is thus highly visible even in darkened rooms, eliminating the need for a separate indicator light. Important alarms can now be further reinforced by a warning tone: the buzzer in the RMQ Titan program ensures that a danger will be more quickly recognized by sounding a piercing, continuous tone.

Special buttons for special demands

Especially dangerous production processes require not only the full concentration of service personnel but also special operating elements. Control devices – mushroom actuators with large button surfaces, for example – provide more security because their shape contrasts with other operating elements and they can also be easily pressed when wearing gloves. Key-operated actuators ensure that certain functions can only be controlled by specialist personnel. These actuators are especially space-saving with RMQ Titan whereby assembled height has been reduced by 50 %.

The double push-button actuators combine up to three functions in one mounting location. An integrated indicator light, for example, is thus optional. For especially rugged industrial applications, individual actuators can be protected from dust, flour, cement, etc. with diaphragms. The special form of actuator diaphragm and the high IP 67 degree of protection also permits application in food industries, in which machines must be frequently cleaned.

Flexibility for individual mounting

RMQ Titan fits into the 22.3 mm standard bore. Up to six contact elements can be snapped on in two levels behind the front. The actuators have become more flush and mounting depth optimized overall. Therefore, a simple switch can now fit into standard commercial wall outlets.

As customary, three mounting styles are possible: flush, surface, and rear. On surface mounting enclosures, the fixing adapter is already integrated into the bottom of the enclosure. Telescopic clips are provided for use in control panels to adjust varying panel depths.

Made-to-measure symbols and text

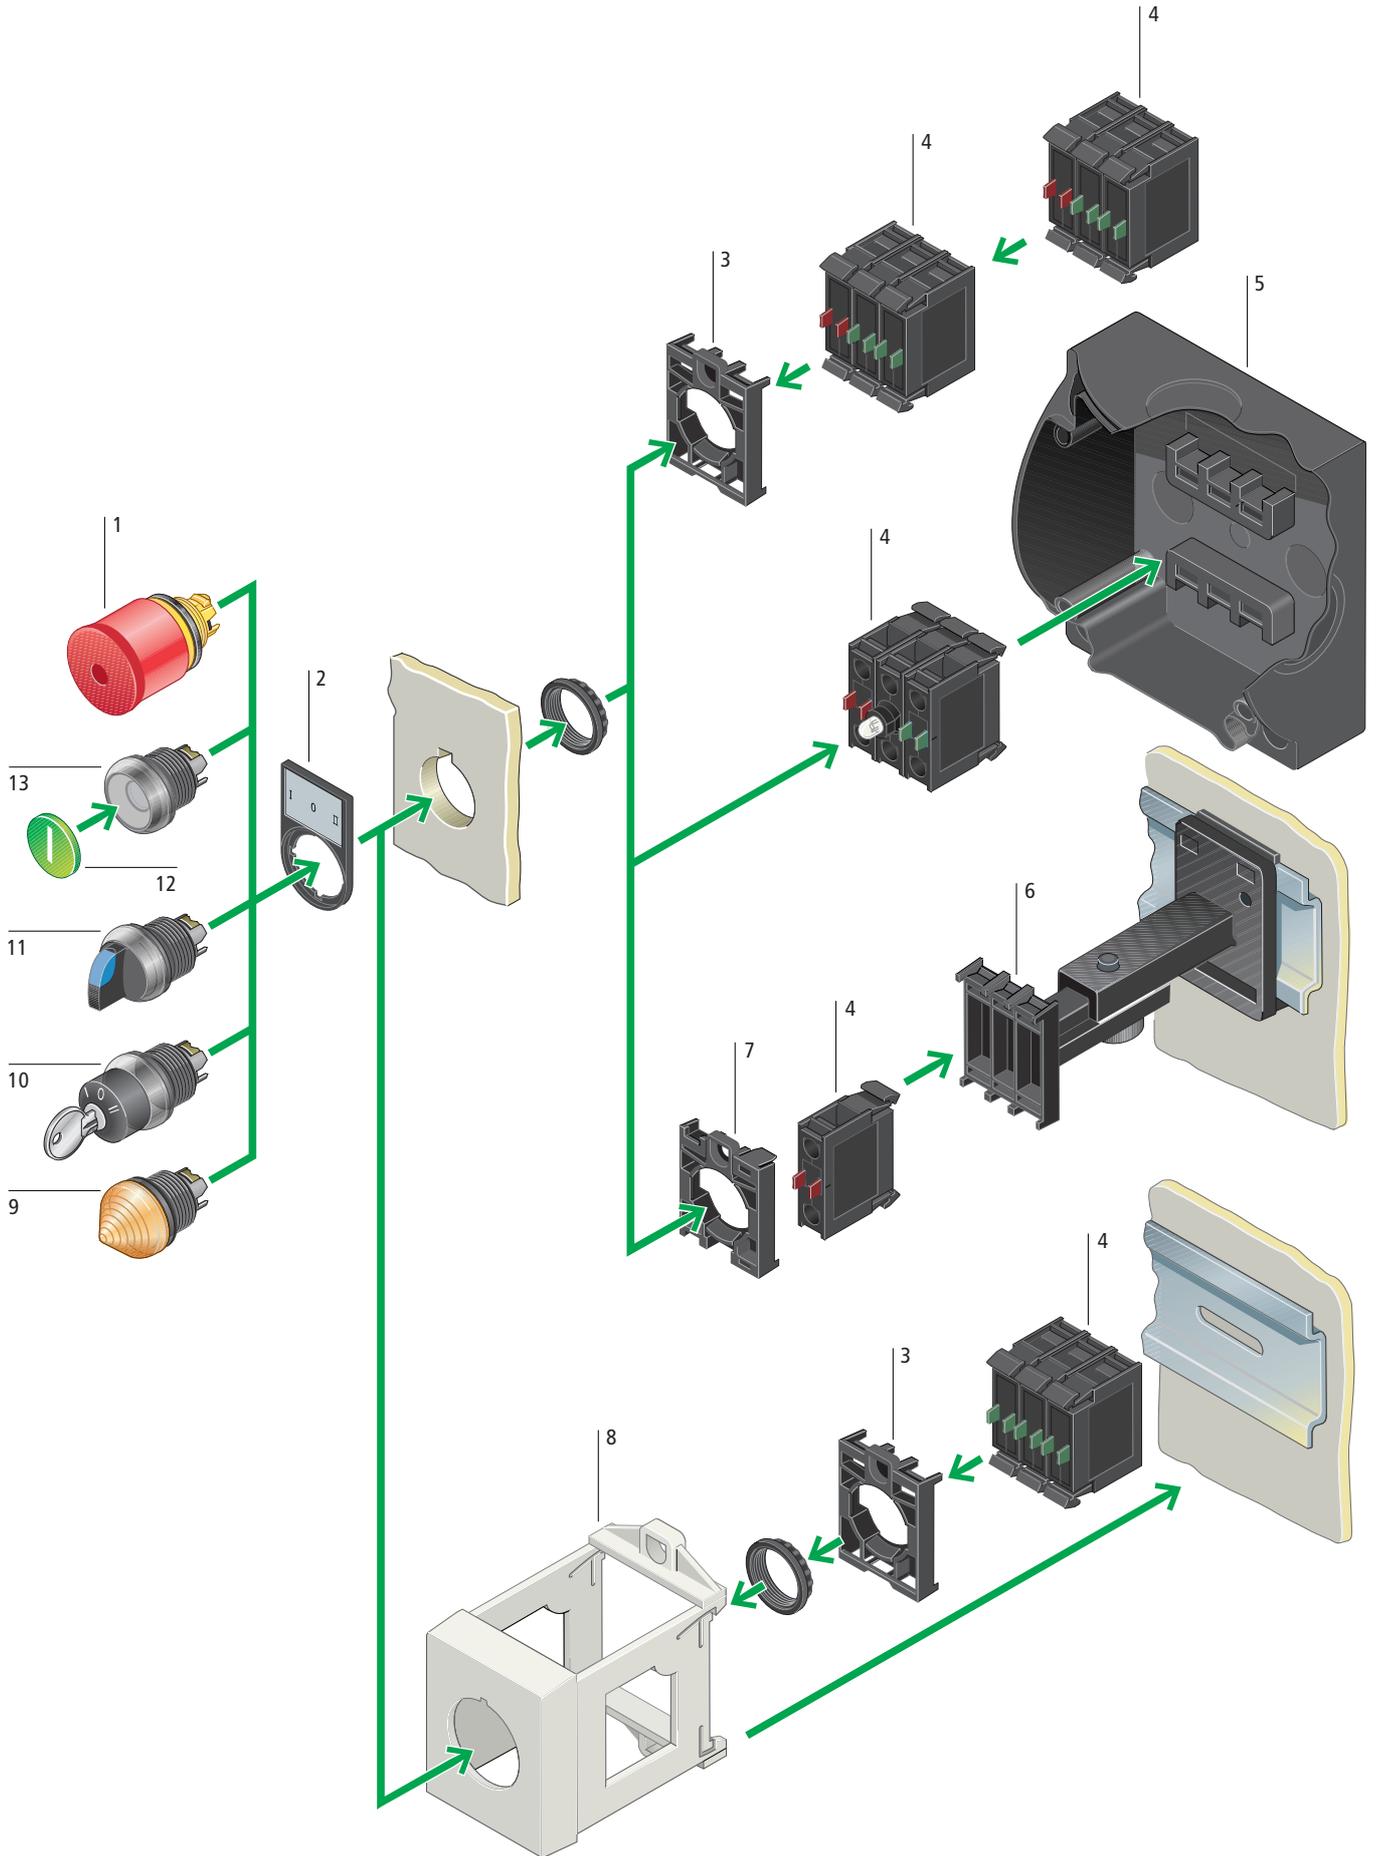

All button plates, indicator lights and additional button plates from the RMQ Titan Control Circuit Devices program can be supplied with any text and symbols. The information is etched by laser and will remain permanently – in contrast to printed elements. Additional button plates can also be engraved, in addition to laser printing.

Stay-put or spring-return – simple to convert

All RMQ Titan stay-put push-button actuators can be set to stay-put or spring-return functions from the side. This pays off, for example, when a jog function is needed during set-up but the actuator is to later remain stay-put. A metal ring is visible from the side when the button is pressed halfway - a simple push converts the function.

And what applies to the push-button actuators also applies to all selector switches. The switching behaviour (spring-return/stay-put) and the withdrawal option for the key can be modified at any time and adapted to the application at hand. Ordering and storage are thus considerably reduced.

RMQ Titan System Overview

RMQ Titan

System Overview

Emergency-Stop actuators	1
Tamper-proof to ISO 13 850/EN 418	
Can be secured by means of sealable shroud	
Additional plates with and without text	

BG classification applied for

→ Page 9

Label mounts	2
For insert plates	
Colour: black	
Insert plates aluminium-coloured, with and without text, can be engraved	

→ Page 25

Fixing adapter	3
For front fixing	
For contact and LED elements	

→ Page 22

Contact elements	4
Break and make	
Universal contacts suitable for use with electronic devices	
Positive opening safety function to IEC/EN 60 947-5 -1	

→ Page 22

LED elements	4
Voltage range:	
18 – 30 V DC	
85 – 264 V AC	

→ Page 23

Enclosures	5
IP 66 surface mounting enclosure up to 6 locations	
IP 54 flush mounting panel up to 6 locations	
IP 40 shrouds for flush mounting plates	

→ Page 27

Telescopic clips	6
For adjusting the depth of rear mounting devices in CI enclosures, CI-K4 enclosures and panels	

→ Page 29

Centring adapter	7
For centring of actuators and indicators when using telescopic clips	

→ Page 29

IVS top-hat rail adapter	8
For direct mounting to top-hat rail to EN 50 022	

→ Page 29

Indicator lights	9
Flush and conical versions	
Colours: white, green, red, yellow, blue	

→ Page 18

Key-operated actuators	10
Two or three positions	
Programmable spring-return/stay-put function and key withdrawal	
Suitable for master key systems	

→ Page 16

Selector switch actuators	11
Two or three positions	
With rotary head, thumb-grip handle	
Programmable spring-return/stay-put function	
Illuminated selector switch actuators with transparent thumb-grip	
Colours: white, green, red, yellow, blue	

→ Page 15

Button plates/button lenses	12
Laser-engraved text for push-button actuators and mushroom actuators	
Button lenses for illuminated push-button actuators and indicator lights, flush	
With standard text and symbols or individual text

Product features

- Snap-fitting modular system
- Front ring in titanium or black
- Mounting diameter: 22.3 mm
- Minimum grid spacing 30 × 40 mm
- IP 66 degree of protection
- Up to 6 contacts per location
- Switching of different potentials
- Approved throughout the world

Standard key			M22-ES-SA(*)-* 217444	M22-ES-SA(*)-* 217444	

Notes

- 1) Master key systems: 6 – 8 weeks delivery time
 - 2) Example: M22-WS-SA(*)-* — Levels e. g. 2.3.1 — Standard key
 - ↳ Group master key
 - ↳ Master key
 - 0 = General master key
- for new orders = new
For repeat orders = Master key system no. acc. security certificate

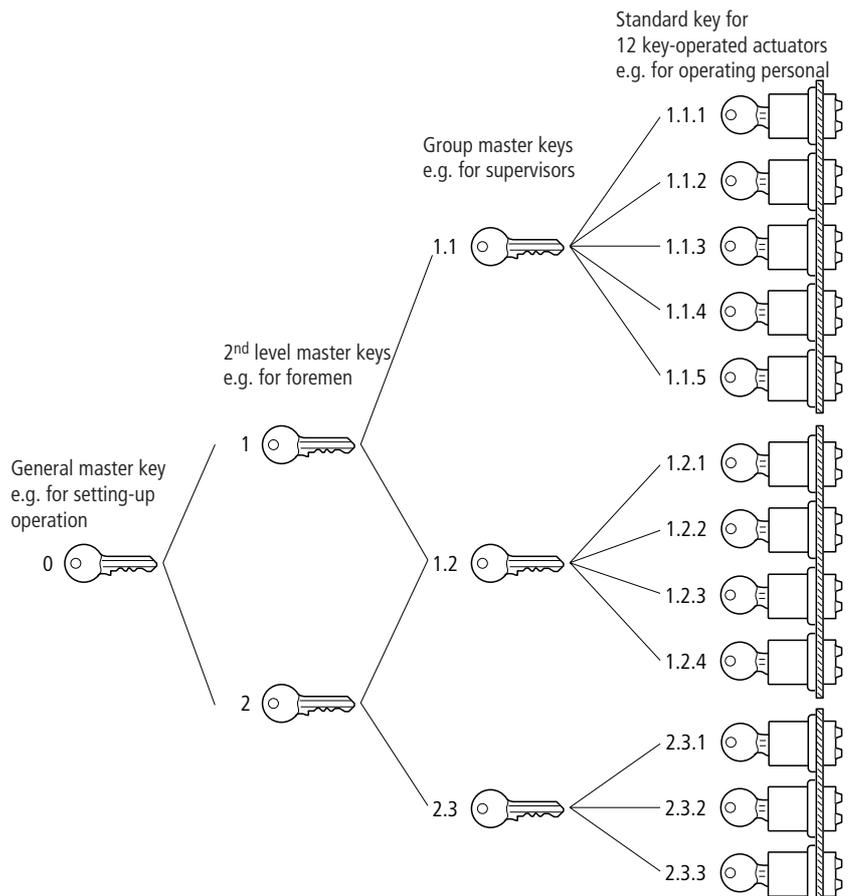

Master key systems

- 8000 different lock mechanisms
- Security certificate prevents unauthorized purchase of keys: enter with repeat orders
- Special key profile provided only by the manufacturer
- Moeller master key systems cannot be combined with domestic locks

Lock plan

Example of a GHS general master key system:

The system consists of 12 individual locks and the associated different keys. At the first level the locks are combined to form 3 groups. For each of the 3 groups there is one master key that can open all locks in its groups. In the 2nd level, the 3 groups are combined to form 2 main groups, the 2nd level master keys can open all the locks from several groups. The general master key covers the 2 main groups can thus open all 12 locks of the master key system.
