

ThermoJacket S: Braided sleeving from E-glass, with an acrylic saturant coating.

The braided glass fibre sleeving is coated with an acrylic saturant coating, which adds rigidity and abrasive strength to the product and reduces the likelihood of endfray. Thanks to this rigidity the ThermoJacket S is easy to apply over long lengths of hose or cable and the large braid angle allows for significant expansion of the sleeve if necessary (for instance with in-line couplings or bigger cable-splices). The material resists most acids and alkalis; is unaffected by most bleaches and solvents. In the field of cable protection, a complete program of ThermoJacket fittings is available for easy installation. ThermoJacket S does not withstand molten splash like Hiprojacket does, but offers good heatprotection at higher continuous temperatures than are possible for Hiprojacket. Applications include thermal insulation and protecting of cables and hoses in the glass, ceramics and steel industry as well as in the apparatus- and machine-building industry. On demand also available with Vermiculite coating which will withstand extended exposure to temperatures up

to +815 °C or completely made from silica with a continuous operating temperature up to +1090 °C.

Material & Construction:

Construction: Braided E-glass sleeving, basic fibre produced according ASTM D-578, with acrylic saturant coating; high continuous temperature, halogen-free, good thermal insulation, abrasion resistant, no end-fray, easy installation for long lengths.

The resistance to acids is fair and to most alkalis is good. ThermoJacket S has a high resistance against bleaches and solvents.

Temperature: -55 °C till +538 °C continuous.

Colour: Gold.

Special remarks: ThermoJacket S is a braided sleeve and for this reason very flexible. Due to its flexibility it can be expanded, so different sizes can be covered with one and the same type of ThermoJacket S.

Please notice that when the sleeve is expanded, more meters are necessary to cover the same length, as indicated in the table below.

TJ-04 on 6 mm core: 1,00 metre TJ is needed to cover 1,00 metre core.
TJ-06 on 10 mm core: 1,00 metre TJ is needed to cover 1,00 metre core.
TJ-06 on 13 mm core: 1,25 metre TJ is needed to cover 1,00 metre core.
TJ-10 on 16 mm core: 1,00 metre TJ is needed to cover 1,00 metre core.
TJ-10 on 19 mm core: 1,15 metre TJ is needed to cover 1,00 metre core.
TJ-14 on 25 mm core: 1,02 metre TJ is needed to cover 1,00 metre core.
TJ-14 on 32 mm core: 1,08 metre TJ is needed to cover 1,00 metre core.
TJ-22 on 38 mm core: 1,06 metre TJ is needed to cover 1,00 metre core.
TJ-22 on 52 mm core: 1,17 metre TJ is needed to cover 1,00 metre core.
TJ-44 on 76 mm core: 1,16 metre TJ is needed to cover 1,00 metre core.
TJ-44 on 102 mm core: 1,51 metre TJ is needed to cover 1,00 metre core.

FITTINGS FOR THERMO- JACKETS IP 40

Anaconda nickel plated brass fittings for Anamet Thermojacket S.

To fit the Thermojacket S you can use the standard Anaconda fittings (which are being used for Sealite), if you replace their standard polyamide clamping rings with the special metal clamping rings mentioned here under. The fittings are also available in 45° - 90° and in stainless steel.

Material & Construction:

Construction: Nickel plated brass fitting, consisting of 4 parts (counter nut, clamping ring, ferrule and body).

Material: Counter nut, body, clamping ring and ferrule are nickel plated brass with exception of size 3/8" till 1" where the ferrule is from galvanised steel. Inserts are made from PA6 (red for ISO metric, blue for Pg and white for NPT).

Temperature: -45 °C till +105 °C continuous (cable-hose-fittings till +300 °C on request).

Protection class: IP 40.

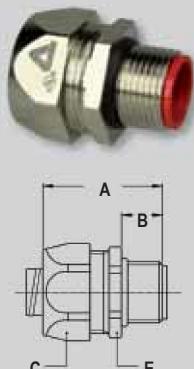

Colour: Metal.

Clamping ring, nickel plated brass, for combination with Thermojacket S.
